**Auspex Technologies, The Mobile Officer Light**

Enforcer, MOLE™ is a portable traffic safety device designed to help police officers enforce red light running in a safe, efficient and cost-effective manner. The MOLE™ operates based on Proactive Enforcement. An officer in the field enforcing traffic and using the MOLE™ is more efficient and cost-effective than red light cameras. Its inconspicuous nature, the knowledge of the potential presence of the MOLE™ at any intersection and the inconvenience of having to face an officer right after committing a red light violation deters more drivers from running red lights.

**Component Products, Inc.** provides both square and octagonal patterns for Aluminum and Cast Iron Bases with a complementary inventory of Aluminum and Steel Poles. They also provide traffic signal hardware previously from Traffic Control Technologies, including all of the Crouse-Hinds patterns for bases, cabinets, and hardware. Polycarbonate Side of Pole Bracket - Anchor Bolts - Nuts - Washers Pole Caps - Lock Nuts - Nipples and related items

**Uninterruptable Power Supplies (UPS) -** Clary SP Series and SP Series, Model PD products are listed by many states as the preferred UPS system for traffic intersection back-up. Clary products are the only products engineered to meet NEMA standards for traffic back-up systems with an operational temperature range of -40°C to +74°C. Clary SP Series and SP Series, are

designed to mount in existing traffic cabinets or in adjacent stand alone cabinets

**Eberle Design, Inc. –** manufacturers of cabinet auxiliary equipment. Signal Monitors, DC Isolators, Loop Detectors,

Flashers, Load switches, 206, NEMA and loop detector power supplies, BIU and SIU's, and software support products. TSC is proud to be able to provide EDI products in our supplied cabinet assemblies in Kansas.

**National Sign and Signal Company**  
Internally Illuminated Signs - Fiber Optic Signs  
Solid State Fiber Optic Technology - LED Signs - Traffic Control Delineators

**McCain** Supplier of complete line of traffic signal controllers, cabinets, signals, signs, software vandal resistant pull box inserts, and test equipment.

**NuArt** Intersection Markers, Metro Markers, ICMS signs, EMS, DMC and DLED Signs

**PELCO Products, Inc. -** Manufacturer of Traffic Signal Hardware.

**TRANSPORTATION-TECH** - Traffic Signal Control's newest addition to its line card, Trans-Tech Specialized Signs and Solutions, and as such is a leading manufacturer of LED signs and signals, providing a variety of customization solutions for the transportation industry. Trans-tech provides blanks out sign capabilities as well as multiple messages – custom applications welcome.

**Polara Engineering, Inc.** - The leading manufacturer of accessible pedestrian products, such as accessible pedestrian signals and ADA compliant pedestrian push buttons. Our Navigator APS provides audible and vibro-tactile

features for all pedestrian phases while their Bulldog Push Button offers the ultimate in durability and state of the art electronic technology.

**Diamond Traffic Products, Inc.** Diamond Traffic Products offers a variety of hardware and software solutions to count and

classify vehicles, bicycles, hikers, and to produce reports and studies.

**Kyland USA** – Kyland is a manufacturer of Green Ethernet Switches including the SICOM3170 specifically design for traffic signal control applications. It is a managed/hardened switch that exceed both NEMA and CALTRAN’s environmental requirements.

**Solar Powered Battery Backed Up Systems** - Traffic Signal Controls, Inc. supplies a large number of solar power signs and other devices that use no AC electrical current. Please contact us for devices and usages.

**MVC, Inc.** – Provides a series of AC and DC power line voltage suppressors designed for individual circuit protection. These devices also provide a high degree of protection against line

noise transients.

**PDC** – PDC is a experienced manufacturer of traffic signal cabinet components, including flashers, load switches, and isolators for both the 170 type and NEMA types.

Contact **TRAFFIC SIGNAL CONTROLS, INC.** for all your transportation related products needs. Backed by years of experience and research into traffic systems engineering and communications, Traffic Signal Controls, Inc. was established to provide city planners, electrical contractors, traffic engineers and governmental agencies with timely,

professional service and a complete line of "state of the art" traffic control systems and ancillary equipment.

The company's objective is to provide the basic ingredient of timely customer service and contemporary engineering techniques with prompt product deliver, careful follow-up and educational seminars and work study/application sessions...a complete package program for the end user. Traffic Signal Controls provides personal interface through every step of system design and installation and supplements its projects with continuing education on the rapid development and changes within the dynamic traffic control industry.

"Being on your own" is no longer the inevitable conclusion of a traffic control installation project. Personal service and follow-through are fundamental principals with Traffic Signal Controls, Inc.

To better serve the Kansas area, Traffic Signal Controls, Inc. has established an office with a warehouse in Topeka, Kansas at Forbes Field. We are stocking most of the products described above in the warehouse and will add items and products as you the customer request. This action will result in a more timely and efficient delivery process. We have several customers who have been able to reduce their in-stock items since Traffic Signal Controls, Inc. stocks these items and this greatly helps to reduce in house stock for customers thus saving money and/or reducing time deliveries.
